

# The Big Star

The big star tried with all his might,  
He huffed and puffed into the night,  
But though he was big, whatever he did,  
He could not shine.

The big star puffed out his chest,  
He really did try his best,  
But though he was big, whatever he did,  
He could not shine.

The big star jumped up and down,  
He clapped his hands and turned around,  
But though he was big, whatever he did,  
He could not shine.

The big star tried with all his might,  
He huffed and puffed into the night,  
But though he was big, whatever he did,  
He could not shine.

# A baby is going to be born

A baby is going to be born,  
A baby is going to be born.  
Tonight, tonight in the bright starlight.  
A baby is going to be born.

A stable is where he will be,  
A stable is where he will be.  
Tonight, tonight in the bright starlight,  
A stable is where he will be.

The angels will sing in the sky,  
The angels will sing in the sky.  
Tonight, tonight in the bright starlight,  
The angels will sing in the sky.

A baby is going to be born,  
A baby is going to be born.  
Tonight, tonight in the bright starlight.  
A baby is going to be born.

# Too Dark!

We're going to Bethlehem in the dark,  
    In the dark, in the dark,  
We're going to Bethlehem in the dark  
    And it's too dark to see.

We're hurrying, hurrying in the dark,  
    In the dark, in the dark,  
We're hurrying, hurrying in the dark  
    And it's too dark to see.

We're tripping up, tripping up in the dark,  
    In the dark, in the dark,  
We're tripping up, tripping up in the dark  
    And it's too dark to see.

We're stumbling, stumbling in the dark,  
    In the dark, in the dark,  
We're stumbling, stumbling in the dark  
    And it's too dark to see.

We're going to Bethlehem in the dark,  
    In the dark, in the dark,  
We're going to Bethlehem in the dark  
    And it's too dark to see.

# Hey Star

Riding in the desert, looking for a star,  
We've got a long way to go,  
We really don't know where we are,  
This journey is so slow.

**Chorus:** Hey Star,  
Why don't you show us the way to go?

On and on and into the night,  
Riding to and fro,  
All we want is a bit of light,  
So we would like to know,

**Chorus:** Hey Star,  
Why don't you show us the way to go?

Instrumental

**Chorus:** Hey Star,  
Why don't you show us the way to go?

Riding in the desert, looking for a star,  
We've got a long way to go,  
We really don't know where we are,  
This journey is so slow.

# Shine Star, Shine

You are a beautiful star, gliding high,  
Floating in the dark, in the sky.

So shine star, shine  
Shine star, shine  
All you have to do is shine.

You are the biggest star and you have a job to do.  
Can you make a start 'cos we depend on you?

So shine star, shine,  
So shine star, shine,

All you have to do is shine.

Repeat verse 1

# Far Below

Down through the night the starlight came  
And made the stable glow, And there in a manger Jesus lay,  
Far below, far below.

All through the night the star shone bright, It showed us  
where to go, And there in a manger Jesus lay,  
Far below, far below.

## Instrumental

Down through the night the starlight came  
And made the stable glow,  
And there in a manger Jesus lay,  
Far below, far below  
Far below, far below.
